Your support

hi how can i deposit for active my account?

We have prepared a simplified step-by-step guide to help you make a deposit to your account using a Bank Card, Apple Pay, Google Pay, etc.
[1]. Go to "Deposit" page: Navigate to the "Deposit" page or follow this link: https://bulcas.com/profile/deposit
[2]. Choose "Bank Card" in "Select a deposit method" section, next choose Coin you want to Deposit in "Select crypto to deposit" drop-down list and finally choose Payment Merchant from a "Select merchant to deposit" drop-down list. After these steps, copy the address of your Account's crypto wallet from the "Address for deposit" field to specify it when making payment and click "Go to" button.
[3]. On payment Merchant: Select Currency and Crypto. Choose the fiat currency you will use for the purchase. Select the cryptocurrency you want to buy (e.g., BTC). The amount of crypto you will receive will be displayed.
[4]. Enter Your BTC Wallet Address: When prompted, enter the address of your BTC wallet address that you copied in step (2).
[5]. Enter Personal Data: Provide your personal data and a valid phone number as required by the merchant.
[6]. Enter Payment Details: Enter your card details and click "Continue" to proceed with the purchase. [7]. Confirmation: After completing the process, expect the crypto to be credited to your Account shortly.
In case of any delays in payments or additional questions, please contact the Live Chat for help.
